Premium Plus

An elevated take on our core PVC wall panel range. Premium Plus panels build on the performance of the Premium range with enhanced designs and greater visual depth, creating a more refined finish.

The open cell PVC structure helps reduce condensation, while improved surface detailing makes this range well suited to modern interiors where appearance matters more.

Tile Line

Solid Core

Designed to outperform traditional MDF and plywood-based panels.

Our solid composite core panels are lighter, easier to cut, and simpler to handle, while being completely waterproof. Unlike wood-based alternatives, they will not swell or degrade if exposed to moisture, making them ideal for high moisture environments.

Displayed In Image:

Shower Niches

A sleek, built-in storage solution for modern bathrooms.

Shower niches provide practical, waterproof storage while enhancing the overall design of shower enclosures and wet areas.

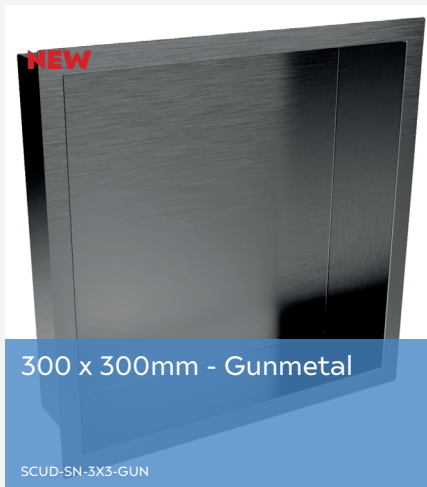

A rectangular metal frame, likely for a window or door, is mounted on a wall. The wall is covered with large, light-colored tiles that have a subtle, veined pattern. The frame is made of a dark, possibly black, metal. The frame is rectangular and appears to be a simple, sturdy design. The background wall is composed of large, square tiles with a light beige or off-white color and some darker, greyish veins. The lighting is even, highlighting the texture of the tiles and the metallic sheen of the frame.

Silicones & Adhesives

Silicones provide durable, flexible sealing solutions for a wide range of applications. Designed to resist moisture, mould, and movement, they deliver long-lasting, reliable seals with a clean, professional finish.

Xtreme Premium Grade Silicone Sealant

A superior anti-mould acetoxysilicone sealant guaranteed to prevent mould, mildew and bacterial growth for up to 10 years.

Available in:

- Clear
- White
- Jasmine
- Grey
- Manhattan Grey
- Black

Multi-Mate Multi-Purpose Silicone

A multi-purpose, acetoxysilicone rubber sealant which contains fungicide. Suitable for most sealing jobs around the home both inside and out.

Available in:

- Translucent
- White
- Brown
- Grey
- Black

Anti-Mould Silicone

A quick-drying, permanently flexible silicone sealant with built-in anti-mould protection. Ideal for durable, long-lasting seals in bathrooms and other moisture-prone areas

Available in:

- Clear
- White

High Strength Adhesive

A solvent-free, instant grab adhesive that sticks almost anything to anything.

Panel Adhesive

An instant grab adhesive that bonds panels securely to almost any surface.

Painters Mate

A flexible filler and sealant designed for smooth, paintable finishes on gaps and joints.

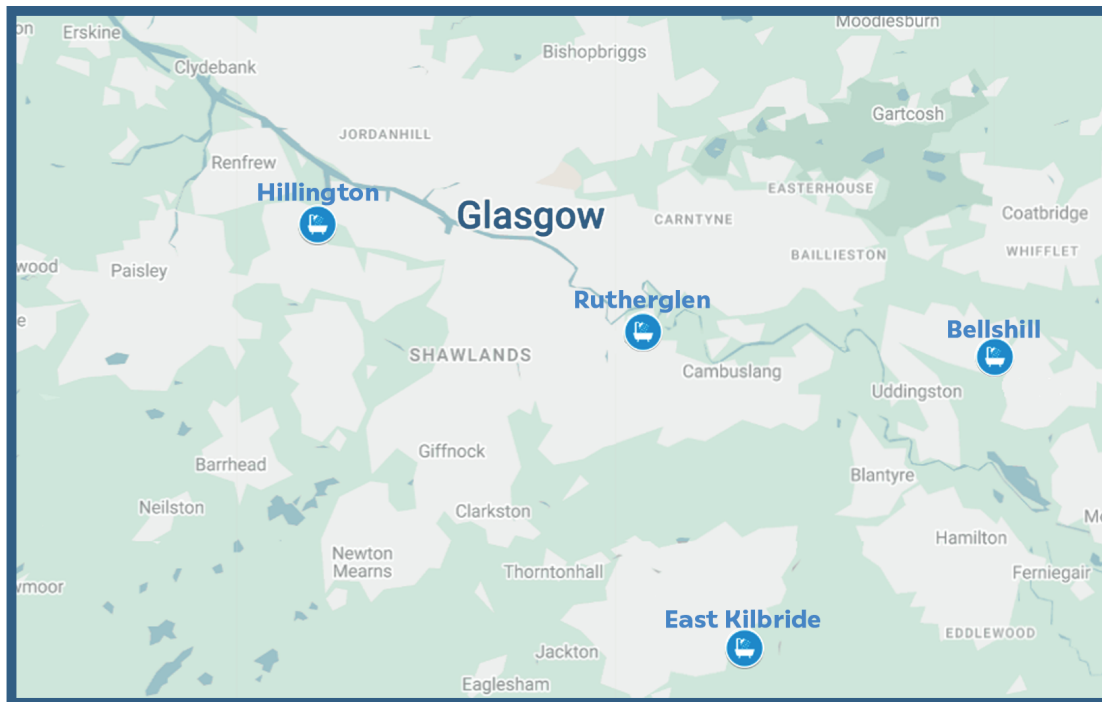

Maintenance & Care

Our wall panels are designed for long-lasting performance with minimal maintenance. To keep them looking their best, simply clean regularly using a soft cloth and mild, non-abrasive detergent diluted in warm water. Rinse with clean water and dry with a soft cloth to prevent water marks.

Important care guidance:

- Do not use abrasive cleaners, scouring pads, or bleach, as these will damage the panel surface.
- Avoid exposing panels to direct sunlight for prolonged periods.
- Do not install or use panels in environments where temperatures exceed 60°C.

Following these simple guidelines will help preserve the appearance and durability of your wall panels for years to come.
